# ChatGPT 3.5 vs 4

How to use Generative AI to create Content

Almost no differences to the end user

- ChatGPT 3.5 and 4 are both models that can be used with the chatbot
- Think of it as the same car with a different engine
- Only changes the backend tech and might improve the responses received from the bot
- Same queries still work with both bots

GPT 3.5

GPT 4

ChatGPT interface

Major Differences

	ChatGPT 3.5	ChatGPT 4
Speed	Fast	Slower
Short Term Memory	8,000 word context	64,000 word context (8x larger)
Limits	Unlimited usage	50 messages every 3 hours
Images	No support	Supports image analysis
Multilingual	Minimal support	Supported
Coding	Minimal support	Good support
Price	Free	$20/month

Major features of ChatGPT 4

- Supports web surfing for up to date information
- Supports plugins (tools that can interface with the AI)
- Better linguistic support and more robust answers
- Better code support, can answer coding questions with more clarity and correctness
- Supports code interpreter that can do things like data analysis
- Multimodal input support (images and text)
- Newer and better AI model
- Larger context

Usage limits

Currently ChatGPT 4 allows 50 messages per every 3 hours. ChatGPT 3.5 does not currently have any usage limits.
