Data Analysis with Code Interpreter

Things to remember

ChatGPT Code Interpreter writes code that is run and can be run in a Jupyter Notebook

Prompts to try:

- Can you find the total population of California

- Does New York or California have more people?

- What is the most populated zipcode

Try these prompts on:

chat.openai.com

Try with this dataset:

https://s3.amazonaws.com/SplitwiseBlogJB/2010+Census+Population+By+Zipcode+(ZCTA).csv

Things you can do

- ✓ Process large datasets quickly

- ✓ Ask complicated queries with regular English and get numerical responses

- ✓ Simplify complicated data in an easy to understand way

- ✓ Take code and run it in Jupyter notebook

- ✓ See complicated queries broken down in a simple way
